- Removable oven base trays and shelf hangers
 - Makes cleaning easier and quicker

OPTIONAL ACCESSORIES

- Pot rack (900mm wide)
- Pot rack (1800mm wide)
- Oven shelf
- Factory fitted castors

VENTILATION

Adequate ventilation, whether natural or mechanical, must be provided to supply sufficient fresh air and to allow easy removal of any products that may present risk to health. Recommendations for ventilation of appliances are given in BS5440:2 and HVCA specification DW/172.

For multiple installations, requirements for individual appliances should be added together. Installation of any such system must be completed in accordance with local and/or national regulations that apply at time of commissioning.

SITING

Install range on a level, fireproof surface in a well lit position. Units are best situated below a ventilating canopy to remove cooking vapours etc.

Installation must be made in accordance with local and / or national regulations applying at the time.

A competent installer must be employed.

If floor is made of a combustible material, local fire requirements must be checked to ensure compliance.

A clearance of 150mm should be observed between appliance rear and any combustible wall.
