SPECIFIER STATEMENT

Specified unit will be a fresh water rinse type high temperature undercounter dishwashing machine with built-in booster.

Machine will be equipped with: LCD temperature readouts and cycle progress indicators. It will feature a fill guard device to ensure proper fill and rinse performance as well as a drain guard to monitor and ensure proper draining of the machine. It will have an automatic pumped drain and an auto-clean feature that washes the chamber at shutdown.

Machine will have standard liquid detergent and rinse-aid dispensing pumps as well as a rinse-sentry feature to ensure proper 180°F final rinse temperature.

1 year parts and labor warranty.

Note: Always follow local building code guidelines.

Complies with ANSI/ASSE 1440 Sections 1.4.3 & 1.4.4

***Note:** Electrical supply service must be a 3-wire plus ground for connection as shown.

Warning: Plumbing, electrical connections should be made by qualified personnel who will observe all the applicable plumbing, sanitary and safety codes and the National Electrical Code.

Plumbing Notes: Because of the variation in house-supplied steam and water pressures, steam and water pressure regulating valves (PRVs) may be needed. (Water PRV is standard on machines with booster.) The PRVs can either be purchased from Champion or obtained locally.

Champion does not endorse using on-demand (tankless) water heating systems, as well as PEX and other plumbing materials that may

limit water flow, as these could impair machine performance. For optimal results, we recommend using appropriately sized conventional hot water tanks and standard copper water supply lines that adhere to our specifications. Not following these recommendations may void the manufacturer's warranty.
