

“Juice anything. Get the most out of it”

The Juice Fountain® XL Pro brings the bar industry’s favorite centrifugal juicer from Breville to the commercial space.

A speed selection dial allows you to maximize your juice yield whether you’re working with citrus, soft fruits, or hard vegetables. The extra wide 3.5 inch feed chute allows you to juice whole fruits and vegetables without pre-cutting, shortening prep time. An included 70 ounce juice jug and 115 ounce pulp bin means you can juice more and clean less. The juice nozzle eliminates mess when juicing directly into serving cups.

Visit www.BrevilleCommercial.com to learn more about our entire line of products and great recipe ideas.

Innovative Cold Spin Technology™ allows juice to flow up and through the stainless steel cutting disc surrounded by an Italian-made mesh filter to ensure an insignificant temperature increase for optimal flavor, color, and nutrition.

Breville | Commercial is the leading manufacturer of cutting-edge equipment for chefs and mixologists. By bringing precision, innovation, and great design to the culinary world we aim to build products that give operators ultimate control so they can focus on delivering their best creative work.

Commercial Juicer
