Specifications

Designed for versatile frying production and solid performance

General: These all-purpose fryers feature outstanding reliability and durability. GF fryers are capable of cooking a wide variety of fried foods with consistent uniformity and great taste.

Construction: The Master Jet burner system's durable metal targets create a large heat-transfer area for reliable, even heat distribution. Durable temperature probe senses temperature changes and activates burner response.

Operation: The open frypot has a large heat-transfer area and every inch of the frypot and cold zone can be cleaned and wiped down by hand.

The large cold zone and forward sloping bottom help collect and remove sediment from the frypot to safeguard oil quality and support routine frypot cleaning.

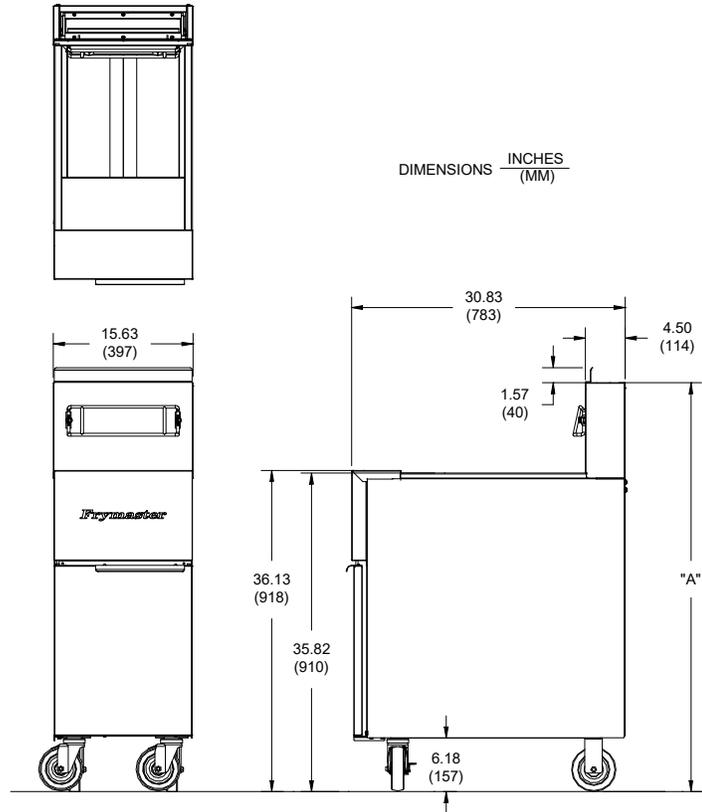

*Liter conversions are for solid shortening @70°F.

**CE Gas Specifications:

- GF14 - 92,000 Btu/hr. input (23,200 kcal/hr) (27 kW) net
- GF40 - 97,325 Btu/hr. input (24,505 kcal/hr) (28.5 kW) net
