Stealth® X

Beverage Series

Built for Long-Lasting Reliability

Meet the Titan X motor from Blendtec® - built to be quieter, run cooler, and with a longer life than any motor before it. Internal motor brushes have been replaced with electronics to increase the lifetime of the motor, give more output and torque to make drinks quicker, and use less power. The Dynamic Braking system stops the blender jar blade instantly, allowing you to remove the blender jar quickly. Take advantage of less downtime by cutting out the need to replace machines and make more drinks without overheating – the blender even cools itself without running!

Stealth® Technology Helps Create A Conversation-Friendly Atmosphere

The Stealth® X includes a sleek sound enclosure and proprietary airflow innovations that enable operation at the sound level of a normal conversation.

Customizable Cycles Provide Consistent Results

In addition to 50 preprogrammed cycles, users can create custom blends with the online Blend Wizard™ tool, then store up to 14 programs on the blender for one-touch operation.

Motor	1800 Watt, 120V / 240V available*	Usage	Recommended daily blends: 225
Interface	Illuminated OLED display with tactile keypad	Warranty	4 Year Parts / 1 Year Labor
