- Precise temperature control
 - ensures superior cooking performance

VENTILATION

Adequate ventilation, whether natural or mechanical, must be provided to supply sufficient fresh air for combustion and to allow easy removal of such products that may present risk to health. Recommendations for ventilation of appliances are given in BS5440:2 and HVCA specification DW/172. For multiple installations, requirements for individual appliances should be added together. Installation of any such system must be completed in accordance with local and/or national regulations that apply at time of commissioning

OPTIONAL ACCESSORIES

- Oven shelf (*additional*)

SITING

Suitable for installation upon any flat horizontal surface.

Sufficient clearance should be left around oven to allow 180° rotation for maintenance purposes.
