

Our aluminum Fish File Rack is designed to hold perforated Lexan pans of fresh fish on ice. The mobile rack is used on the cook line, to hold fresh fish prior to cooking, and can be rolled back into the walk-in between high volume periods to maintain freshness.

Each unit has heavy duty casters attached to a welded platform plate for added caster strength.

Switching this product from stainless steel to aluminum saved the end user several $1,000 per unit.

Options:

This is a custom rack that can be designed to hold any product or container.

Guarantee:

Lifetime Guarantee against rust and corrosion.

5-Year Guarantee against material defects and workmanship.

99554 | Fish File Rack

Shelves are set at an angle to allow water to slide down the back, into a removable pan located at the base of the unit.
