CONSTRUCTION, HARDWARE, INSULATION

Cabinet exterior front, sides, pan cover lid and doors are constructed of heavy gauge stainless steel. Cabinet interior and door liners are constructed of anodized aluminum. The exterior cabinet back at the bottom are constructed of galvanized steel.

Doors self close at less than 90 degrees and also includes a stay open feature at 105 degrees. Gasket profile and material simplify cleaning and increase overall gasket life.

Both the cabinet and doors are insulated with an average of 2" thick high density non-CFC, foamed in place polyurethane. A ¾" thick, full-length, reversible white nylon cutting board is supplied standard.

PANS & COVER

Each model is supplied standard with its full compliment of 4" deep plastic 1/6 size pans and stainless steel pan dividers. The lid is constructed of stainless steel, and is easily removable for cleaning.

REFRIGERATION SYSTEM

A balanced, rear mounted, front breathing, self-contained refrigeration system using environmentally-friendly, low GWP R-290 refrigerant is provided. It features a capillary tube metering device, air cooled hermetic compressor, a forced air evaporator coil and a non-electric condensate evaporator. An 8' cord and plug is provided. Standard operating temperature of the refrigerated base is 34° to 38°F (1.1° to 3.3°C).

CONTROLLER

An electronic digital control is supplied standard. It includes a 3-Digit LED display, and a Fahrenheit or Celsius temperature scale display capability.

INTERIOR

Standard interior arrangements include two (2) powder coated wire shelves per door, mounted on pilasters. These are adjustable in ½" (1.27 cm) increments, allowing for a minimum of 1½" (3.81 cm) spacing between shelves.

WARRANTY

Both a six year parts and labor warranty and a seven year compressor parts warranty (self-contained models only) are provided standard.
