

NE-1878 | ALL-METAL-DOOR INVERTER MICROWAVE

Save up to 18% on energy consumption compared to competitors* with the NE-1878BPQ thanks to our Inverter Technology. It maintains perfect power control to ensure faster, more even, gentler cooking and retains essential nutrients and vitamins in food. The stackable all metal door design not only allows for easy cleaning, increasing the overall lifespan but perfectly fits in any environment including open plan kitchens.

Energy-saving High-performance Cooking

Microwave
1800W

Technical Specifications	
Power Source	50Hz, single phase 230-240 V
Required Power	11.6A 2650 W
Power Supply	13 Amp
Frequency	2450 MHz
Outer Dimensions	422x476x337mm
Cavity Dimensions	330x310x175mm
Output	High P10: 1800 W
	Medium High P9: 90% / P8: 80% / P7: 70% / P6: 60%
	Medium P5: 50% / P4: 40%
	Low P3: 30% / P2: 25%
	Defrost P1: 340 W
	Off P0: 0%
	Heat from top down PU1: 50% / PU2: 25%
	Heat from bottom PL1: 50% / PL2: 25%
Net Weight	approx. 17.5 kg
Timer	Maximum programmable time for single stage heating P1 and P0=30 minutes P10-P2, PU1-PL2=15 minutes

*LC type microwave (2830W) compared to Inverter microwave (2650W)

**IEC Test Procedure. Specifications subject to change without notice

ENERGY-SAVING

With Inverter microwaves, you can save up to 18% on energy consumption*, which is good for the environment, and your wallet.

EVEN HEATING

Inverter technology allows you to cook, reheat or defrost your food without creating cold spots or overcooking edges. This Inverter microwave delivers an accurate power level; when you ask for 60% power, the oven delivers 60% power for the entire duration of the cooking time chosen. This applies no matter what power level is selected giving you better, more even cooking results.

METAL DOOR

The world's first all-metal door professional microwave with Inverter technology. An innovative design, specifically intended for the UK market. A full-metal door microwave that looks like a conventional oven. It adapts to every environment and you can even install it in your open kitchen. Most importantly the inside of the metal door has no ridges, seals or film to clean around, leaving it totally smooth. This makes the inside of the unit very easy to clean and can increase the lifespan of the oven.

SPLATTER SHIELD DETECTION

The NE-1878 has been programmed to cease operations when the ceiling plate is not in place, preventing damage to the cavity and expensive repairs. To allow continuous use, the NE-1878 comes with a spare ceiling plate.

LIGHTER & SMALLER

Inverter microwaves are equipped with a compact and efficient power supply that weighs only 500g. This makes the overall unit lighter, more portable and easier to move around for cleaning. The total unit weight has been reduced to approx. 18kg (40% less compared to NE-1853).
