

aerolatte

The incredibly frothy coffee company

Eighteen years ago, Alan and Gary, founders of aerolatte® were in search of the best solution for making perfect frothy milk for cappuccino, caffè latte, milkshakes and hot chocolates. They found it. Their passion for great frothy milk drinks became a global business as the creation of "the original steam-free milk frother" changed the home coffee experience forever.

And as true coffee lovers, they didn't stop there. The aerolatte® range has expanded considerably and now embraces innovative equipment to brew coffee in a variety of traditional ways as well as accessories to further their aim: to help the consumer achieve professional results at home, simply and easily.
