Multi-rinse Rack Type dishwasher, Energy Saving Device, ZERO LIME Device, CLEAR BLUE Filtering system, WASH SAFE CONTROL, DIN 10510 and A0 60 certification, Right>Left, 150r/h

**535143
(EMRA060L)**

Multi-rinse Rack type dishwasher, Energy Saving Device, ZERO LIME Device, CLEAR BLUE Filtering system, WASH SAFE CONTROL, DIN 10510 and A0 60 certification, Left>Right, 150r/h

Short Form Specification

Item No. _____

Unit to be green&clean multi-rinse rack type dishwasher. Operating direction right to left or left to right. Featured built-in Energy Saving Device (ESD) recovers the heat inside the machine to heat up incoming cold water to the boiler. ZERO LIME device automatically de-scales the whole hydraulic circuit and all washing & rinsing chambers. Multi-rinse area with built-in Wash-Safe Control system and rinse booster pump guarantees constant rinse pressure. CLEAR BLUE filtering system removes majority of soil from the wash water to ensure clean water for long time. Included large pre-wash zone. Maximum Water Contact (MWC) wash arms are positioned along the full length of the wash tank. Powerful wash pump and specially designed wash spray arms guarantee cleaning. Final rinsing is done with clean water heated up to 90° C that is re-used in several phases in pre-rinse. Multi-rinse with double rinse tanks and multi rinse arms re-uses rinsing water several times to ensure hygiene on washed wares. Three conveyor speeds are selectable by the operator. Intuitive touch screen control panel provides easy communication on different levels. Easy drain of water done through control panel. Standard end of the day self cleaning cycle and sanitation cycle both including internal side of the door. Modularity allows split delivery, customization and upgrade on-site and over time.

Main Features

- Performance is certified for disinfection level according to DIN 10510 standard (3rd speed) and A0 60 level according to EN 15883-1 standard (1st speed as Disinfection cycle) by independent third party.
- ZERO LIME Device as a fully automatic cycle ensures total scale removal from the boiler, the hydraulic circuit, the washing chamber and the rinsing chamber allowing ultimate performances and lower energy consumption thanks to highly efficient heating elements.
- Built-in Energy Saving Device (ESD) utilizes the hot steam generated by the machine in the rinse and wash tanks to heat up incoming cold water up to 55°C before entering the boiler, thus saving energy.
- CLEAR BLUE filtering system removes soil from the wash water providing cleaner water and highly active detergent thus ensuring better washing performance and lower running costs.
- Built-in WASH-SAFE CONTROL system raises water temperature to 85°C to sanitize the rinse water. No external boiler is required. Built-in air break and rinse booster pump ensure constant temperature and pressure throughout the rinsing cycle regardless of the inlet water condition.
- Maximum Water Contact (MWC) wash arms are positioned along the full length of the wash tank.
- Multi-rinse arms in combination with double rinse tanks re-use final rinsing water in several phases to ensure hygiene and complete detergent removal on the washed wares.
- Auto-start/stop equipped in different zones ensures that the zone runs only when a rack is passing through it. This reduces water, energy, chemical consumption and noise.
- Built-in drain valve in the tanks allows automatic dump and fill to refresh the water in the tank without any interruption of the washing process.
- Intuitive touch screen control panel features user-friendly display to easily operate the machine and to monitor machine status. Three different levels of interaction are available each show relevant messages and information to the operator, the general maintenance staff and the authorized service partners.
- Automatic drain, clean and sanitize cycles featured as standard. The internal chambers, including the internal doors are completely cleaned or sanitized avoiding bacteria proliferation for maximum hygiene and reducing manual work/time for operator.
- Self-draining wash pumps provide maximum hygiene and all wash and rinse zones drain automatically at the push of a button.
- All internal components: wash and rinse arms, tank filters, curtains can be easily removed for cleaning.
- IP25 protection against water jets, solid objects and small animals (larger than 6 mm).
- Large counter balanced inspection doors allow unrestricted all-round access to the wash and rinse area. Door is insulated with injected foam. This adds strength as well as reduces noise and heat

APPROVAL: _____

loss.

- Adjustable feet for full access underneath the machine for cleaning.
- Splashhood at the entrance avoids water spilling outside the machine.
- Unit equipped with USB port making it simple to read data such as machine identification, counters and consumption, components, devices and alarm logs. Machine parameters can be uploaded and downloaded and firmware updated.
- Automatic back-up mode is activated when a failure occurs. Guided troubleshooting for fast fixes including 300 precises notifications and 23 easy-to-follow processes.
- Maximum capacity per hour of 150 racks.
- Multi rinse technology guarantees low rinse water consumption of minimum 0.7 liters per rack to ensure perfect disinfection result at low energy, water, detergent and rinse aid consumption.
- Three conveyor speeds (in which 1° speed as Disinfection cycle certified A0 60 according to EN 15883-1 standard and 3° speed certified according to DIN 10510 standard,) can be selected through the control panel by the operator.

Construction

- Modularity design allows the machine not only be disassembled for delivery and re-assembled at customer's site, but also to be customized and upgraded on-site and over time.
- All main components made in heavy duty anti-corrosive 304 type stainless steel: external front, side panels and internal chambers, wash and rinse arms, doors and rack transportation system.
- Dishwasher structure is held together with a solid 50 x 50 mm stainless steel frame to provide long-term sturdiness.
- All electric components are put in one IP65 central box isolated from water and steam to ensure high reliability.
- External pre-arrangement for inlet water, drain water, detergent & rinse aid connections for fast and easy installation on both sides of the unit.
- Deep drawn pressed wash tank with fully rounded corners, sloped towards the drain to prevent dirt build up provides fast drainage in only a few minutes. Pressed wash tank with no welded points offer a guaranteed water tight solution.
- All chambers without internal pipes and therefore no hidden dirt traps.
- The unit is built on modularity concept for easy to add up to 2 dryer modules onsite.

Included Accessories

- 2 of Kit splash hood for rack type with ESD PNC 865280
- 12 of Kit splash hood for rack type with ESD PNC 865280
- 1 of Kit delime for rack type PNC 865282
- 3 of Basket for 12 soup bowls - green PNC 867000

Optional Accessories

- Medium hot air blower zone without door for Electrolux green&clean Multi Rinse Rack Type Dishwasher PNC 534056
- Corner drying zone for Electrolux green&clean Multi Rinse Rack Type Dishwasher PNC 534057
- Medium pre-wash zone for Electrolux green&clean Multi Rinse Rack Type Dishwasher with Energy Saving Device, ZERO LIME Device, WRAS/Watermark approval PNC 535036
- Large pre-wash zone for Electrolux green&clean Multi Rinse Rack Type Dishwasher with Energy Saving Device, ZERO LIME Device, WRAS/Watermark approval PNC 535037
- Medium drying zone with door for Electrolux green&clean Multi Rinse Rack Type Dishwasher PNC 535038
- Large drying zone with door for Electrolux green&clean Multi Rinse Rack Type Dishwasher PNC 535039
- Kit end limit switch for Rack Type dishwasher PNC 864138
- Kit of 12 stainless steel plugs for washing arms for multi-rinse and compact rack type PNC 864239
- Kit drain pump for rack type PNC 865283
- Kit water softener for Rack Type dishwasher PNC 865284
- Reverse osmosis for rack type PNC 865285
- Kit water meter PNC 865286
- Kit wi-fi module PNC 865287
- Support for GN trays in Rack Type dishwashers PNC 865288

Electric
Supply voltage:

535142 (EMRA060R)	380-415 V/3N ph/50 Hz
535143 (EMRA060L)	380-415 V/3N ph/50 Hz

Default Installed Power: 59.8 kW

Pre-wash tank heating elements: 14 kW

Wash tank heating elements: 20 kW

Triple tank heating elements: 7 kW

Boiler heating elements: 14 kW

Pre-wash pump size: 1,5 kW

Wash pump size: 1,5 kW

Rinse pump size (final, duo, triple): 0.55 / 0,32 / 0,32 kW

Water:

Inlet water line size: G 3/4" / G 3/4"

Inlet cold water line size: G 3/4"

Drain line size: 50mm

Inlet water supply pressure: 1.5-6 bar

Inlet water supply temperature (wash and rinse): 10 - 65°C

The higher the temperature, the faster the warm-up.
 Recommended temperature: 50°C.

Inlet water supply temperature (rinse and pre-wash): 10 - 30 °C

Inlet water supply hardness: 0 °fH / 0°dH

When below 7°fH/4°dH special detergent and rinse aid are needed.

Peak rate of drain flow: 18 l/s

Pre-wash tank size: 70 l

Wash tank size: 70 l

Duo rinse tank size: 20 l

Triple rinse tank size: 20 l

Rinse water consumption at max. speed (l/h): 140l/h

Key Information:

Rinse water consumption at max. speed (l/rack)*: 0.7

Productivity per hour (2° speed): 120 racks / 1440 dishes

Productivity per hour (A0 60 certified speed): 75racks/900dishes

Productivity per hour (DIN 10510 certified speed): 150 racks / 1800 dishes

Pre-wash temperature: 40-60°C

Wash temperature: 68 - 75 °C

Triple rinse temperature: 80 - 85 °C

Duo rinse temperature: 75 - 80 °C

Final rinse temperature: 90 °C

External dimensions, Width: 3270 mm

External dimensions, Height: 1785 mm

External dimensions, Depth: 895 mm

For transportation purpose only, the depth can be reduced to 795mm by removing the control box and the door handles.

Height with door open: 2095 mm

Charging hole size (width): 530 mm

Net weight: 569 kg

Shipping weight: 673 kg

Shipping height: 1970 mm

Shipping width: 3450 mm

Shipping depth: 1040 mm

Shipping volume: 7.07 m³

Noise level: 58 dBA

Reference norm used to measure the noise: IEC60335-2-58 annex AA.

Table to table distance: 3270 mm

Air Emission:

Air flow (top, exit): 86 / 145 m³/h

Air temperature: 27 - 45 °C

Air humidity (top, exit): 100 / 100 % r.h.

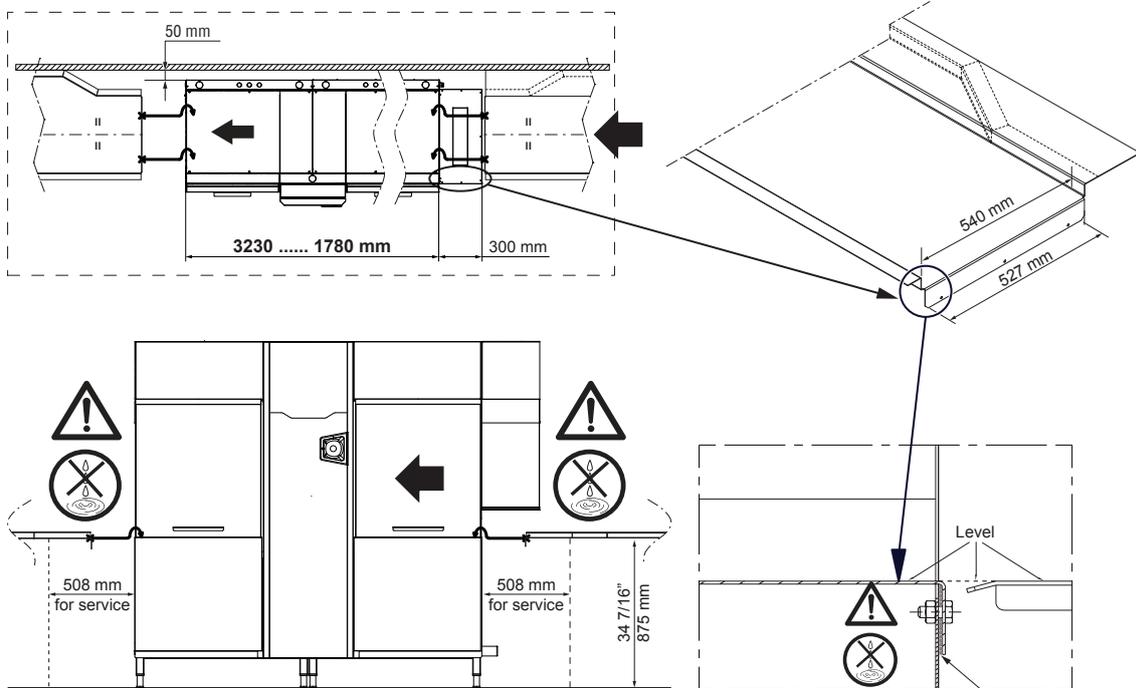

The data is measured at exhaust points at 25°C and 60% r.h. ambient conditions, 18°C inlet water temperature and refer only to the machine.

Latent heat: 6500 W

Sensible heat: 5300 W

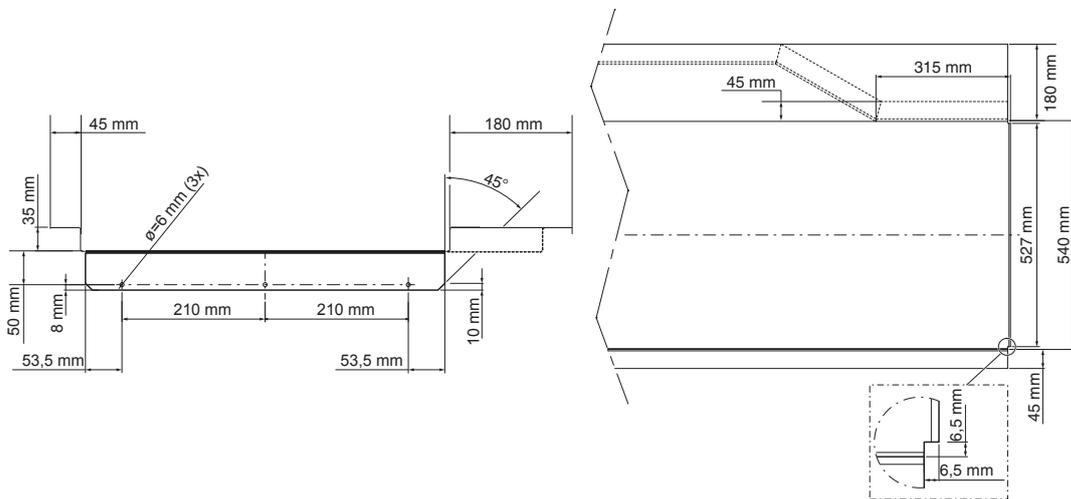

This model requires a ventilation hood. Please refer to the attached "Recommended Exhaust Hood Design".

RECOMMENDED TABLE CONNECTION

⚠ Apply silicone between the machine and the table and make sure that there are not any water leakages.

⚠ Silicone

All tables must be connected to the dishwashing units according to local regulations and industry standards which may differ from the recommendations herein suggested. Electrolux Professional is not liable for any failure in complying with local design standards.
