

WS-CS-90112-RFG-RRR-IR configuration shown.

HEARTH CAPACITY

8" pizzas:	74	16" pizzas:	19
10" pizzas:	54	18" pizzas:	12
12" pizzas:	35	5" bagels:	450-500/hr

Assuming 5-minute cook times, the approximate maximum hourly production capacity can be calculated by multiplying the above numbers by 12. Cook times will also vary depending on "style" of pizza. **Note:** The addition of a decorative flame will decrease space and impact overall cooking capacity.

The Fire Deck 90112 oven features a door opening 57 inches wide x 10 inches high. The cooking area is 68 inches wide x 96 inches deep, resulting in a 45-square-foot cooking surface. A tensioned steel exoskeleton surrounding the hearth and dome perimeter ensures structural integrity and longevity. Wrapped in spun ceramic fiber insulation and requiring only a 1-inch side clearance to combustibles, the monolithic 6-inch thick cast-ceramic hearth and monolithic 4-inch thick dome rest on a black painted steel stand. The oven body front, top, back and sides are finished with galvanized steel. The oven can be equipped with up to 3 radiant flame burners, typically 3 on the left or right side, as well as a thermostatically controlled Underfloor IR burner.

The oven arrives completely assembled, ETL Listed, ready to install and is made in the USA. A set of casters ship on the oven to assist with installation (remove once installed). Information about custom finishes, tools and accessories can be found online at: woodstone-corp.com.

FUEL CONFIGURATIONS

GAS-FIRED ONLY: Configured to burn either natural gas (NG) or liquid propane (LP).*

RADIANT FLAME + UNDERFLOOR IR (RFG-IR):

Heated by up to three adjustable radiant flame burners typically located on one side of the cooking chamber along with a thermostatically controlled infrared burner which is mounted under the oven deck to ensure high production capacity without heat recovery issues.

WOOD-FIRED (W): Wood-fired only.

WOOD WITH GAS ASSIST (W-IR): This wood-fired model is assisted by the additional BTU/hr of an Underfloor IR burner.

Note: A wood fire is required with this configuration.

COMBINATION (-W): Allows optional wood burning for ovens with gas burner configurations. **Note:** Adding wood to an oven with an RFG burner will reduce available hearth capacity.

*Gas type must be specified at time of order.
