

P9EO18701871

The Parry electric range P9EO oven and the 1870 and 1871 hobs can now be bought as a package, ensuring a more cost effective way to buy the units. With indented tops to collect any spillages and sealed hot plates on the hobs this creates incredibly durable and clean units, which suite perfectly to sit atop the heavy duty, tough, P9EO oven. The P9EO is also designed with its controls side mounted to reduce the overall height of the unit so units stacked on top are the ideal height to work with.

- 1870: 3kW
- 1871: 7kW
- P9EO: 5kW
- P9EO has max temp of 280°C with two ring elements and two fans
- Capacity for two 1/1 gastronorm pans per shelf
- Independent thermostatic control of all six hobs and each can be set between three boiling and three simmering positions
