EQUIPMENT SPECIFICATIONS

CONSTRUCTION, HARDWARE, INSULATION

Cabinet exterior front, one piece sides, pan lid, and drawers are constructed of heavy gauge stainless steel. Cabinet interior is constructed of anodized aluminum. The exterior cabinet back and bottom are constructed of galvanized steel.

The cabinet is insulated with an average of 2" thick high density, non-CFC, foamed in place polyurethane.

A 3%" thick, full-length, reversible white nylon cutting board is supplied standard.

PANS & COVER

Each model is supplied standard with its full compliment of 4" deep plastic 1/6 size pans and stainless steel pan dividers. The insulated lift-up pan cover is constructed of stainless steel, and is easily removable for cleaning.

REFRIGERATION SYSTEM

A balanced, rear mounted, front breathing, self-contained refrigeration system using environmentally-friendly, low GWP R290 refrigerant is provided. It features a capillary tube metering device, air-cooled hermetic compressor, a forced air evaporator coil and a non-electric condensate evaporator. An 8' cord and plug is provided. Standard operating temperature of the refrigerated base is 34 to 38°F [1.1° to 3.3°C].

CONTROLLER

An electronic digital control is supplied standard. It includes a 3-Digit LED display, and a Fahrenheit or Celsius temperature scale display capability.

DRAWERS

They are constructed using heavy gauge stainless steel drawer slides and 11/4" diameter stainless steel rollers. Gasket profile and material simplify cleaning and increase overall gasket life. Drawers include both a self-closing and stay-open feature.

WARRANTY

Both a six year parts and labor warranty and a seven year compressor parts warranty (self-contained models only) are provided standard.
