Bartender stainless steel modules are designed to create a versatile underbar system. The modules are simple to design and install and can be easily reconfigured. Bartender modules offer great flexibility for any size or shape of bar and special units can be made on request.

Bartender worktops are 304 brushed stainless steel and feature a unique raised front profile or “bull-nose” to reduce the risk of drips and spillage of liquids onto the serving area. BZ17/052 is a 45° corner infill with splashback which is designed to link 2 runs of Bartender modules at worktop height.

ACCESSORIES:

BB02/210 double leg frame if the corner top finishes a Bartender “run”

OTHER:

Manufactured to ISO9001
