

CENTURY

NEW EXTRA-DURABLE ALUMINUM COOKWARE

PROFESSIONAL COOKWARE WORTH CELEBRATING

pujadas[®]
A VOLLRATH[®] COMPANY

Manufacturers since 1921

After 100 years in business, the time has come to go back to our roots, when Pujadas® was already skillfully working with aluminum, producing its unique and well-known milk pitchers.

At a time when we want to be close to the hospitality industry and when we believe innovation is vital, we present our new CENTURY aluminum cookware.

100 years

From our origins as manufacturers, and with a century of knowledge and experience under our belts, comes CENTURY, pure aluminum cookware distinguished by design, ergonomics, sturdiness, thickness, uniformity, and safety. It is undoubtedly a unique collection that perfectly complements the wide range of Pujadas® products.

CENTURY

Made of 100% recyclable pure aluminum sheets, with great performance in thermal conductivity, maximizing its energy efficiency.

Greater thickness means greater impact and deformation resistance, thus extending its useful life. Its extra-thick base prevents deformation, ensuring that it is in full contact with the heat source and thus maximizing energy and saving time and money.

Heat-insulating, tubular stainless steel handles exclusively designed to facilitate handling and minimize the risk of burns from contact with the body of the container.

Extra-strong attachment with 4 rivets per handle, increasing safety. **Sturdiness, ergonomics, safety, efficiency, and high conductivity:** a combination that makes CENTURY professional cookware a cause for celebration.

CENTURY

Extra-strong pure aluminum cookware

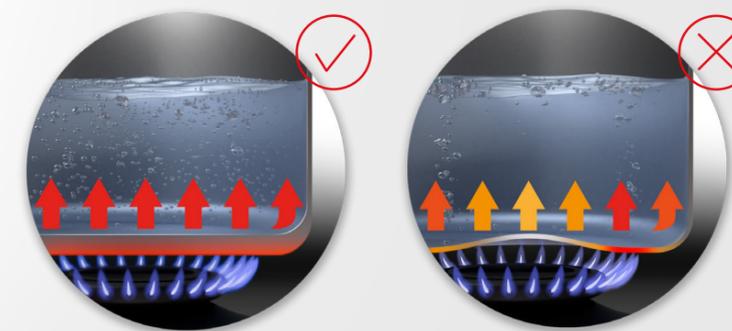

Made in Spain

Homogeneous cooking

Excellent thermal **conductivity**

Base **thickness** that prevents deformation, in full contact with the heat source, thus improving energy efficiency

Cookware is sold without lids.
