Specifications

Continuous temperature measurement at the bottom of the pan with Realtime Temperature Control System multi-point technology (RTCSmp).

The reliable overheating protection prolongs the service life of both the induction appliance and the cookware.

Consistent power transfer over the entire cooking time for optimal cooking results.

Convenient cooking without heating up the cooking environment thanks to direct heat transfer from the hob to the pan by means of induction.

Easy to clean thanks to a removable, washable and reusable air filter.

Cool to touch cooking surface, means no "burn on" of food debris on the cooking surface.

Exceptionally robust and developed for continuous operation in the restaurant industry.

Reduction of the maximum power from 100% to 25%.

Mains voltage detection and automatic loading of the optimal parameters. Single-phase version (up to 3.5 kW) at 208V - 240V: identical worldwide.

Automatic shut-off feature prohibits overheating.

The unit fits the power that the operator has available.

Warranty: 2 years on parts & labor (US and Canada only).

NOTE: Induction cooking requires use of induction-compatible cookware.
