STEAMER CAVITY DELIMER

The Cleveland Delime is a ready-to-use, specifically formulated delimer that removes stubborn lime scale and mineral buildup from steamer cavities, restoring proper heat transfer and consistent steam production. Regular deliming helps your equipment heat more efficiently, cook more evenly, and recover faster between cycles. By building this simple maintenance step into your routine, you protect your investment and help prevent unnecessary downtime or costly service calls.

READY TO USE

- Removes heavy lime scale
- Restores steamer heating efficiency
- Extends equipment life
